BISHOP OF CALGARY TO ADDRESS BOARD OF TRADE

The Publicity Committee of the Board of Trade are fortunate in being able to get the Right Rev. F. Ralph Sherman, D.D. Bishop of Calgary to give an address on Thursday, Nov. 17th at their first luncheon after the summer recess. Bishop Sherman is considered one of the few outstanding speakers in Canada today, and arrangements are being made to have the luncheon in the U.F.A. Hall, so as to give members and their wives, and those who are not members, the opportunity of hearing the address.

Letter in New York Times on British "Dole"

If useful work cannot be found to the necessary extent, or paid for at the necessary figures, provide useless work—but work. Make those seeking relief carry bricks from one side of the road to the other one day and put them back the next if sufficient ingenuity does not exist to provide something more intelligent. Make everyone who seeks relief give work in return. But do not give relief under such conditions that people will prefer it to honest, useful work when it can be found. That has been done to too great an extent, and, unless circumvented, will be one of the worst and lasting results of the depression.

THE WIND-UP OF SCHOOL FAIR PRIZE WINNERS

Silver cup donated by the Canadian Bank of Commerce for school obtaining the greatest number of points at Fair in proportion to the number of pupils in attendance at school at time of Fair. Won by Greenwood School.

A second prize to the above of a football, donated by F. E. Osborne, Calgary. Won by Sunshine School. \$3.00 in cash, donated by R. M. McCool, M.L.A. to the girl securing the greatest number of points at the Fair. Won by Grace Riddell. \$2.00 in cash donated by R. M. McCool, M. L. A. to the boy securing the greatest number of points at the Fair. Won by Tom Cummings.

\$5.00 cash donated by R. T. Amery for the best foal. Won by Donald Leask.

\$1.00 cash, donated by Lloyd Havens for the best foal, the got of Ayton Sensation. Won by Charlie Russell.

Scholarship Short Course
Scholarship Short Course for one boy and one girl from each School Fair. The selection of the winners to be based on the maximum number of points won.

Grace Riddell and Tom Cummings of Greenwood school are the respective winners of the short courses.

Miss Riddell was the winner of the short course at the Carstairs School Fair last year, and as a pupil is not allowed to attend more than one short course, it is not known what will be done until word is received from the Department of Agriculture.

LADIES AID MEETING

The regular monthly meeting of the Ladies Aid of the United Church will be held at the home of Mrs. Belshaw, Wed., Nov. 2nd.

NOTICE

With the approach of Halloween, parents are hereby given notice, that they will be held responsible for any damage done by their children, who by themselves, or with the help of others, are implicated in any damage to property within the Village.

Parents are asked to govern themselves and their children accordingly.

(Signed) On behalf of the Village of Crossfield
J. M. WILLIAMS, Mayor.

Remembrance Day

November 11th, being proclaimed a National holiday, it is to be hoped that the morning of that day in this district will be set aside in remembrance of those who gave their lives in the war. A service will be held in Crossfield at 10.45 a.m. when the members of the Canadian Legion will pay reverence to their comrades who gave up their lives both during and since the war. The service will be very short and everybody will be welcome.

BUY A POPPY

You are earnestly requested to buy a poppy, not only to pay tribute to those gone before, but also to give employment to disabled ex-service men engaged by the Government in vet-craft shops. Every poppy being made by a disabled soldier.

Win Four Medals at Inter-Schools Track Meet

Four medals were won by Crossfield students at the Inter-Schools track meet at Carstairs, Oct. 5.

Girls Open—Gold medal, Margaret Fitzpatrick. Silver medal, Vera Green. Bronze medal, Verna Pogue.

Girls 15 years and under—Gold medal, Kathleen Fitzpatrick. Silver medal—Verna Pogue, Crossfield. Irene Bellamy, Madolaine Kain and Gertrude McLean, all of Didsbury, tied for second place.

Margaret Fitzpatrick was again Crossfield's high scoring athlete with 15 points. She was first in the three events in which she entered.

Dr. Kerby Here on Nov. 6

It will be seen from another column that Dr. Kerby will preach at the United Church on Sunday, Nov. 6. Dr. Kerby is one of Alberta's outstanding speakers, and a preacher of the first rank. Remember the date, Sunday, Nov. 6.

To Attend S. S. Convention

A number of the United Church Sunday School teachers are going to Carstairs Friday afternoon to attend the Sunday School Convention at which Miss Seville is to give a paper.

THE NEW LIBERAL LEADER

An enthusiastic convention of Alberta Liberals at Edmonton on Friday afternoon selected W. R. Howson, Edmonton, as their provincial leader. There were 480 delegates present.

No Wheat Bonus This Year

OTTAWA, Oct. 25—Canada's financial position will not permit the government to grant a bonus on wheat for the 1932 crop. This was announced by Premier Bennett in the House of Commons today.

Payments made to western farmers last crop year under the bonus scheme amounted to over 11,000,000.

Local Breeders Sell Hereford Cattle

Mrs. Jas. Robertson of the A over C Ranch sold two carloads of Hereford cattle to the University of Alberta on Tuesday. The shipment consisted of a carload of yearlings and a carload of calves. Mr. Collicutt also sold a Hereford steer to the University.

These cattle will be fed by the University in certain groups, so as to demonstrate the gains in weight than are possible by feeding different rations. And in buying cattle for this purpose they want the best they can get.

Frank Collicutt of the Willow Springs Ranch sold two pure bred Hereford cows and two calves to Onell Bros. of Danfield, Ont.

Mr. Collicutt sold a bull to Onell Bros. while at the Toronto Royal Winter Fair four years ago, and they were so well satisfied with this animal that they came away up here to Alberta to get some more of the same breeding.

Unprofitable Practices Followed On Farms Causes Heavy Losses Which Could Easily Be Avoided

While many unprofitable practices are followed on farms throughout the country there would appear to be three that are outstanding that should long ago have been corrected, observes J. B. Spencer, Director of Publicity, Department of Agriculture, Ottawa.

These practices are the thick sowing of corn for a fodder crop; the rotting down of farmyard manure; and the carrying on of dairy farming with cows the production of which is not determined by modern methods.

It is many years since it became generally understood that the thick planting of corn not only wasted seed, but resulted in a crop of low feeding value. It has long been demonstrated and the information made public that farmyard manure loses value about at the same rate as it loses weight. Still these two practices are permitted to cause heavy losses among particularly the class of farmers who can ill afford the waste that is incurred.

It is advised that these practices are there is perhaps more excuse for them than that of feeding, housing and milking cows that give so little as not to pay their own way in the herd. Testing of cows for production by simple and sure methods has been long carried on in this country, and thousands of herds have been built up to a profitable rate of production. Owners of hundreds of thousands of cows and thousands of herds have not taken advantage of this service, and are each year helping to depress the farming industry. According to the latest issued report of the Federal Minister of Agriculture thirty thousand cows, representing three thousand three hundred herds, were tested, within the past fiscal year under the Live Stock Branch cow testing policy, which operates in all the provinces except British Columbia, Saskatchewan and Ontario. That is to say, of the more than 1,800,000 cows, trouble was taken to weigh and test the milk of only 30,000 during sufficient of their lactation period to indicate the returns they were making through the milk-pail. Of this number 13,180 cows averaged 5,810 pounds of milk, containing 250.77 pounds of butterfat; 2,830 cows gave 300 pounds of butterfat; and three of the herds averaged more than 500 pounds of butterfat and 28 averaged 400 per cow.

The discovery by testing of the actual production of cows usually leads to several advanced steps in farming practice. The unprofitable producers are no longer maintained in the herd, and the better cows are given greater care. More suitable and heavier yielding feeds are grown, and improvement by the use of better sires is at once commenced.

To assist farmers in having their herds tested upwards of twenty dairy promoters are employed by the Federal Department of Agriculture in encouraging and helping in the testing and recording of herds within cow testing associations of which there were 264 operating in the provinces of Alberta, Manitoba, Quebec and the three maritime provinces. The Live Stock Branch at Ottawa is ready to assist and direct farmers in utilizing modern methods in determining whether or not the cows are producing milk in profitable quantities.

The Other Side

As the Ottawa Journal remarks, the subject of dogs is a "ticklish one." To most of us, on occasion, dogs are a nuisance, but there is another side to it. There is the boy-and-dog side; the nondescript little animal, a nuisance to some, perhaps, but to the boy a companion to be fought for and protected. Let us not forget the boy's side of the question; to him it means a very great deal.

Modern proverb: "Presents make the heart grow fonder."

We are celebrating our maid's jubilee today.
"Has she been with you 25 years?"
"No, she is the 25th we have had this year."—Vart Hen, Stockholm.

W. N. U. 1008

Big Game Hunters Travel By Airplane

Parties Being Organized In Europe For Trips To Africa

Expeditions are now being organized in which big-game hunters, by travelling to and from Africa by air, save weeks as compared with surface transport. Nairobi, in the heart of the big-game country, is only seven days from London by the regular air route.

Hitherto the exigencies of time, owing to the length of the journey involved, have limited sport in Africa to the leisure few. But the speed of the African air-mail now solves the problem of the modern sportsman who needs to reach, and return from, the big game lands as quickly as possible.

Speed is not the only advantage of the airway when traversing Africa. It also affords splendid views of wild life from the air. Recently, for example, during a flight from Cairo to Uganda, the King of the Belgians obtained, along the sections from Wadi Halfa to Malakal, some magnificent views of big-game in natural surroundings. From the windows of his air saloon he saw buffalo, giraffe, and herds of elephants numbering nearly 1,000 animals; and it is interesting to note that on this occasion, though the pilot steered low over the elephants to afford the King the clearest view, they did not stampede or take fright, being apparently undisturbed by the passage of the aircraft above.

Rudder Travels By Truck

"Berengaria," 55-Ton Tall Taker

North Sea Repairs
One of the queerest travellers that has ever taken the road from Southampton to Darlington was the 55-ton rudder of the "Berengaria." This tall of the mighty liner had to go north for repairs. It was too heavy and unwieldy for any British railway system, so "Kathleen Mavourneen," the world's largest lorry, took the 55 tons of rudder, upon her 10 wheels and made a gallant progress from the great Hampshire port to the grimy iron district of the north. Police and road scouts were busy the whole 200 miles of road warning motorists what they must expect if they should meet the mighty traveller on narrow stretches. The great lorry was greeted with cheers in many a village as she passed through doing a stolid eight miles an hour. The only check of the journey was encountered just outside the village of Wrenthorpe on the Great North Road, where there was a breakdown through engine trouble, and something like 12 hours were lost. The journey altogether occupied six days, and 16 hours, and the lorry consumed nearly 300 gallons of gasoline.

Periscope Advertising

Little To Be Gained By Spasmodic Attempts At Publicity

Advertisers of little experience expect too many results too quickly, according to A. J. Denne, advertising counsel of Toronto.

"They take the view," he said, "that if advertising is a seed, something must show above the ground the day after the seed is planted." If advertising is a stimulant, then it must agitate the heart and limbs into action immediately and violently.

Mr. Denne pointed out that time is a great essential in advertising and that a campaign must be put forward persistently and patiently if results are to be expected.

"It is not natural for two days of sunshine in March to melt all the snows of winter," he said.

Impatience he pointed out, is the cause of many spoiled advertising campaigns, which are called off before they have had a real chance to take root.

One For The Irish

"You know, Pat," said the Scot, "some time ago we dug the ruins of a fourteenth century castle in Scotland and found a lot of wire. This proves that telegraphs and telephones were used in Scotland already in the fourteenth century."

"Well," answered Pat, "in Ireland we made a more wonderful discovery. We dug up a prehistoric dwelling and found no wire at all. That proves that our Irish ancestors in prehistoric times used wireless."

Canes are again in vogue in England.

Explorers Find New Varieties Of Fish

Expedition To Little-Known Islands Bring Back Rare Specimens

Four-eyed fish that, use one pair of eyes beneath the water and another above and fat red fish with eyes that shine in the dark were among the trophies brought back by the Templeton Crocker Expedition from the little-known islands of Mexico and Central America.

Some 400 specimens of birds also were obtained, and mammals, plants, insects and marine life collected by the expedition which travelled 9,000 miles.

Fifty gallon jars closely packed with marine life dredged from the sea at depths from six to 200 fathoms were brought back. These, it is claimed, contain many novelties.

The four-eyed fish captured is declared to be found only in a shallow Honduras river. With double eyes, it swims just below the surface, one pair of eyes scanning the air for insects and the other set watching the bottom for food.

Share Renting Of Farms

Helpful Circular Prepared At Ontario Agricultural College

An excellent circular containing a brief but comprehensive discussion of the principles and conditions of share renting of farms has just been prepared by Department of Agricultural Economics at the Ontario Agricultural College.

Anyone interested may secure a copy by writing to that department. Two main plans of rental are set forth, namely crop-share renting and live-stock-and-crop-share renting. Many modifications of these are suggested and discussed. Tables are given showing satisfactory proportional division of expenditures and returns as between landlord and tenant, under varying conditions of soil fertility, buildings and equipment, and market facilities. The circular also contains a form of agreement which should prove very useful, both to tenants and to those who have farms to rent, in helping to avoid some of the pitfalls common with loosely stated or with unwritten agreements.

Cost Of High Schools

Free Secondary Education For Every-body Is Becoming Expensive

The outcry against the unprecedented cost of high school increases day by day, and the attack centres pretty much around one point.

The question at issue is this, says a writer in Toronto Saturday Night: "Can we afford free secondary education for everybody? As long as only a small proportion of children presented themselves for it the question did not rise. Now, with half of all children appearing in high school—very much more than half in cities—it forces itself upon us. If all of the youth attempting it were capable of benefiting from it it might be a good investment. This may be something of what a leading English educationalist has in mind when he tells us that in the old land they cannot afford it, neither can we, but we do not realize it."—Sault Daily Star.

Dorothy—"How long is it to my birthday?"

Mother—"Not very long, dear."

Dorothy—"Well, is it time for me to begin to be a good girl?"

(By Helen Williams)

WHAT NEW YORK IS WEARING Illustrated Dressmaking Lesson Furnished With Every Pattern

Here's something extremely smart in a brown plaid woolen dress. It's the new coat type exactly like the grown-ups with a big boy collar of white pique. The little artist's tie is vivid red, crepe de chine to match the leather belt.

It's easily made! It's a one-piece affair with an inset inverted plait at the front to give ample hem fullness. Style No. 3180 requires 2 yards of 36-inch material with 1/2 yard of 36-inch contrasting and 2 yards of binding for the 8-year size.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The Only True Measure

What a Man Is, Not What He Hires, Estimates Worth

Not what a man has, but what a man is, is the true measure of a man's worth. It is his properties rather than his property, by which he is to be estimated. And the way a man shows what he is, and what are his properties, is by his chosen activities in life. His tastes and his gratifying, his desires and their pursuing, are a resultant evidence of a man's character. "He acts, therefore," says Marcus Aurelius, "that every man is worth just so much as the things are worth about which he busies himself."

IS THE UNITED STATES PRESIDENT AN ENGLISHMAN

It has been disclosed that not long ago a great deal of research was made by officials in the Town Clerk's Department of the Town of Kensington, England, to find out whether or not President Hoover was ever a British subject. The period of the search covered the years between and including 1911 and 1915. The inquiries related to the United States President, who many years ago lived at the "Red House," in Horton Street, Kensington. No official information has been given concerning the result of the search. Above is a picture of the entrance to "Red House," while inset is a good photograph of President Hoover.

Spanish Apiarist Has Evolved A Plan To Greatly Increase The Production Of Honey

Russia's Five-Year Plan Near Failure

Production Dropped Off This Year Instead Of Increasing

Complete production figures for the first seven months of the current year indicate practically the end of the Soviet hope to complete the five-year program for basic industries like ferrous metals, coal, transportation and agriculture in four years.

The production figures showed that industry gained 17 per cent over the corresponding seven months of 1931, but this was less than half of the 36 per cent growth set for the year with the view of completing the five-year program.

Industrial growth may if sharp improvement is achieved in the final year of 1932, reach 20 or 22 per cent, which is about the average for recent years. But this would be still far short of the Soviet goal and leave the "patriotika" unfinished.

The most disturbing element in the statistical picture for the seven months of 1932 is the fact that the output in leading industries has been declining rather than increasing. After a fairly good start in January and February, production slumped gradually as food and transport difficulties pile up.

Generator Used Again After Fifty Years

First To Furnish Commercial Power For Electric Light

Although the hand of the master inventor was not there to help, Old Jumbo No. 9, the first generator which ever furnished commercial power for electric light, came to life recently at Henry Ford's Greenfield Village. The occasion was the dedication in New York of a plaque at the site of the old Pearl St. station which housed the generator 50 years ago.

As the old generator, rebuilt and housed in the Ford museum, swung into action a description of the scene was conveyed to the New York dedicatory group by radio.

Alex Dow, now president of the Detroit Edison Company, handled the valve wheel. He recalled that when Thomas A. Edison first turned on the generator and provided electric light to 400 New York homes, he was studying under a flickering lamp light in Liverpool. As Dow turned the valve, the same Edison had handled a half century ago, the old generator, sired to all the great power plants of today, leaped into action and current went through the circuits to light a dozen old-fashioned light bulbs.

Mrs. Smith (showing portrait of herself on her mother's arm): "This is how I looked twenty years ago." Guest: "Wonderful! And who is the baby on your arm?"

Although there is only one lawyer in Canada for every 1,600 people, there is one lawyer in the House of Commons for every four members of other callings.

Working on the theory that the busy bee still can be kept busier, Don Jose Rovira Mari has invented a hive which may revolutionize the bee industry.

Senior Rovira is an experienced beekeeper at Benafay, in Valencia. After perfecting his new device and becoming convinced that the productivity of the bees can in some cases be increased 100 per cent, he has demonstrated his apparatus at the museum of natural sciences, Madrid, where it created a good impression.

The basic principle of the new hive is the simplification of the bee's labor so that it can devote more of its energy toward the business of making honey. The apparatus is known as the "fountain-hive," for to extract honey, all that is necessary is to perform a simple operation with a device of Rovira's invention, and then open a spout through which the honey flows out.

All of this is accomplished without disturbing the bees, and in this manner all the complicated procedure of the old style beekeeping is eliminated. "Furthermore," he explained, "the 'fountain-hive' enables us to incite the bees to more work. In the springtime, when there is plenty of nectar in the flowers, their capacity for making honey is greatly increased. In order to utilize this potential capacity all one has to do is to start off the honey, and they will then begin to produce more."

"And, in view of the fact that the honeycomb is practically undisturbed, the energies which the bees would otherwise have to be constantly making to create a new comb are economized, and can be devoted to the task of producing more honey. Or, in the case of the bee raiser who buys manufactured combs, the new process obviates the necessity for purchasing them."

"Of course, as things are at present, many persons desire to buy their honey in the comb, in order to be sure of its purity. But when the public learns that the product of the 'fountain-hive' is guaranteed to be extracted without the necessity of having to touch the comb at all or of frightening the bees away by smoke or some other method, and instead is obtained by simply turning a key and letting it run out in all its purity, without any pollen or other matter, they will be reassured of its quality."

"There are many incidental advantages of the new invention," Rovira added, "one of them being that there is no necessity for ever inflicting the bees. When, under the present system, the beekeeper goes out to rob the bees, he is well protected by a net around his face, and gloves—but the infuriated bees go as far as two kilometers away, stinging other persons, who do not happen to have a net around their faces. Under the new system they are never molested, and hence are perfectly happy—and for that reason, they produce more."

Rovira has made a life study of bees. He long ago became convinced that they are more intelligent than man, and that man, in utilizing the activities of the bee, was not getting as much results as might be accomplished, for the very fact that certain rather unsuitable elements were adopted by the bee industry.

How Aviators Could Withstand Altitude

Scientist Advises Breathing Oxygen

Airplane pilots could rise to altitudes of fifty thousand feet, nearly ten miles, without danger of death from the rigorous experience if the nitrogen gas in their bodies is expelled before they leave earth by breathing oxygen for one hour before the ascent.

Sir Leonard Hill, the eminent British physiologist, so concludes in a communication to the British scientific journal, Nature, as the result of experiments on animals under low pressure conditions.

"The lady complains that you showed her no courtesy."
"But, sir, I showed her everything we had in the shop."—Vart Hen, Stockholm.

TROOPS QUELL SECOND RIOT AT PORTSMOUTH

Kingston, Ont.—More than 200 maddened convicts, defiant in the face of machine guns and rifle fire, rioted in open mutiny in Portsmouth penitentiary.

Seven hundred mates howled their approval from the iron-barred cell block of Canada's largest penal institution.

One prisoner fell wounded before the rifle fire of troops summoned for the second time in four days from Kingston barracks by distressed prison officials. Prison authorities, who reported no further injuries, said the man was not seriously hurt.

The climax of three days of unrest since the initial outbreak came when 110 prisoners in an "overflow" dormitory overpowered the 40 guards and released another 110 convicts from tiers of cells in the "big house."

Windsor, Ont.—Collapse of a rumor that sentences of all inmates were to be reduced one-third was one of the chief causes of the riot at Portsmouth penitentiary, according to "Red," a former convict released last month. The former convict also said there was little doubt "rotten food" and lack of cigarette papers also contributed to the recent outbreak.

Locomotive Blast

Boller Explodes, Bringing Death to Engineer and Injuring Fireman
Dymond, Ont.—Michael Harris, engineer, is dead, and Tom O'Flaherty, fireman, and the brakeman, are injured as the result of a boiler explosion in the engine of a mixed stock and freight train, a mile and a half east of here.

Messengers reports of the accident are reaching here over crippled communication channels. All wire communication between eastern and western Canada was cut off at the point of the explosion between Kenora and Fort Frances, Dr. Morrison, of Dryden, and Miss Watson, of the Red Cross hospital here, left hurriedly for the scene of the tragedy.

The train was eastbound on the Canadian Pacific Railway when the explosion occurred. Both Harris and O'Flaherty are residents of Kenora, Ontario.

Cost Of Canadian Navy

Sum Expended During Last Fiscal Year Was \$3,043,509

Ottawa, Ont.—The total expenditure on the Royal Canadian Navy for the fiscal year ending March 31, 1932, amounted to \$3,043,509. Of that sum the amount needed to clear construction costs of the two new warships, "Saguenay" and "Skeena," was \$500,008. The navy is rapidly approaching the status of a Canadian-managed force. Of the eight commanders now serving in the R.C.N., seven are Canadians.

Up to the end of the fiscal year these ships ran up a bill of \$92,561.68 for fuel oil, a minimum cost in view of the fact that the "destroyers," "Saguenay" and "Skeena," were not commissioned until May and June of last year.

By-Election Is Closed

Liberal Candidate Noses Out By Majority Of One Vote

Summerside, P.E.I.—Given a majority of one vote in the by-election, Dr. J. F. MacNeill, Liberal, was declared elected to represent the fifth district of Prince in the Prince Edward Island legislative assembly.

His total vote, officially announced by the returning officer, was 1,387. H. M. Downing, his Conservative opponent, received 1,386. It is understood that Mr. Downing will file application for a recount.

Labor Battalion Formed

B.C. Plans To Carry Out Road Work During Winter

Victoria, B.C.—British Columbia's first labor battalion sprang into being when provision for the segregation of young men in camps, members of non-permanent active militia, was made so that these men may be placed in a single camp in the university endowment lands area, Point Grey, Vancouver, under military discipline, with the object of carrying out road work in that area during winter months.

W. N. U. 1935

Request Passes For Workless

Alberta Asks Help From Ottawa For Stranded Men

Edmonton, Alberta.—Efforts to move single unemployed men, residents of Vancouver and other British Columbia cities, who have been stranded in Edmonton and Calgary and other prairie points as a result of the ban on freight train riding, are now under way.

Premier J. E. Brownlee stated no intimation had been received as to what Ottawa was prepared to do.

It is understood R.C.M.P. officials have suggested each man be required to make an affidavit as to his proper place of residence and then the required number of railway passenger cars, of the colonial type, be requisitioned by the federal government to take the men to their homes. Under this plan each man would receive a pass to travel on these cars.

Vancouver, B.C.—Mayor L. D. Taylor has moved swiftly in an effort to block Edmonton's agitation at Ottawa for the removal of the "rod-rider" ban. Fearing a flood of unemployed from the prairies on Vancouver and other coast cities, his worship wired Prime Minister Bennett, urging the ban remain.

For Disarmament

Memorial To Premier MacDonald Urging Acceptance Of U.S. Proposal

London, England.—Three hundred well-known Britons signed a national memorial to Prime Minister Ramsay MacDonald urging acceptance of the principle of the United States proposal to cut armaments by nearly one-third.

The memorial said the government should "as a practical step towards establishment of a status of equality in armaments declare forthwith acceptance of the principle of the proposal of President Herbert Hoover." Among the signers were Lord Cecil, the Archbishop of York, Dean Inge, Sir Oliver Lodge, Sir Norman Angell, Maud Rayden, John Drinkwater, John Galsworthy, and H. G. Wells.

Voyage Was Uneventful

Miss Cora Hind Arrives in England From Churchill

Avonmouth, England.—Miss Cora Hind, Winnipeg newspaperwoman, arrived at this Gloucestershire port aboard the Italian motorship "Juventus," 13 days and 21 hours after leaving Churchill, Man. She was the first woman to sail from Canada's northernmost seaport.

What impressed her most was the fact the pilot was dropped only two miles out of Churchill after which the ship steamed steadily between nine and 10 knots, meeting fog only on one day.

During the entire 3,978 miles, she said, the ship had sighted only four icebergs, all early in the trip and all at a considerable distance.

Japanese Bandits May Release Captives

Have Come To Agreement About British Subjects Is Report

Shanghai, China.—Japanese intermediaries at Mukden were reported to have reached an agreement to effect the release of Mrs. Kenneth Pawley and Charles Corkran, British subjects, who were captured several weeks ago by bandits.

The agreement provides for payment of 130,000 yen (about \$32,500), 250 pounds of opium and a supply of winter clothing for the bandits.

World Economic Conference

Date For Meeting in London To Be Decided Soon

Ottawa, Ont.—The date for the convening of the World Economic Conference in London, England, will be decided upon some time in November, it was stated on highest authority. Fixing of the date, which may be in December or January, will be a matter of agreement between the government of the United Kingdom, which extended the invitations, and foreign and other powers who will be represented at the parity.

Beef Exports From Alberta

Calgary, Alberta.—More than 100,000 pounds of beef was exported from Alberta in 1931, according to S. G. Carlyle, Alberta Livestock Commissioner. There were exported also 105,000 head of cattle, of which 6,000 went overseas. He stated 1931 would go down in history as having the lowest livestock price levels in 30 years.

The Thames Riot

Matter To Come Up For Debate In House Of Commons

London, England.—Twelve hours after 10,000 jobless men and women had rioted across the Thames from Parliament Square, Prime Minister Ramsay MacDonald promised to permit debate soon in the House of Commons on unemployment.

A questioning member of parliament previously had brought up the riot as a subject of discussion, and Sir John Gilmour, the Home Secretary, reported the demonstration was organized by a Communist organization.

Fifty men and four women, who were rounded up during the rioting and looting that followed, were taken into ancient Lambeth police court recently under heavy guard. Outside crowds of unemployed began to assemble but police lines held them in lower Kennington Lane.

The prisoners were sentenced to pay fines of 40 shillings each (about seven dollars) or serve jail terms of 14 days to one month.

After Long Sleep

Girl Said To Be Recovering From Sleeping Sickness Lasting Many Months

Chicago.—Like Washington Irving's Rip Van Winkle, Miss Patricia McGuire, 27, who has been ill with sleeping sickness since last February 24, is going to have a lot of news to catch up on when she awakens from her long slumber.

Physicians who have attended her in her suburban home in Oak Park say there are unmistakable signs that she is awakening and her friends are wondering what her reactions will be to the many things that have happened since she fell asleep.

MAY CONSIDER FIVE CENT BONUS FOR 1932 CROP

Ottawa, Ont.—The Federal Government is considering paying a bonus of five cents a bushel to western Canada's farmers of the 1932 wheat crop.

This was definitely stated in the House of Commons by Prime Minister R. B. Bennett, when questioned on the subject by John Vallance, Liberal, (South Battleford). No indication was given when a decision could be expected.

A bonus of five cents a bushel was paid to western wheat growers last year, by the government, and was paid through the board of grain commissioners.

The question and answer between Prime Minister Bennett and Mr. Vallance were short.

Mr. Vallance said he had received three telegrams from points in the west, each urging him to press for the bonus of five cents a bushel on wheat. One telegram, he said, stated if the bonus were not granted, "revolution was inevitable."

"The government has the matter under consideration," the Prime Minister replied.

WHEN FIFTY MILLION METHODISTS UNITED

The picture above shows the deed of union being signed by the three leaders at the Methodist Revision Conference when the three great Methodist groups in the Mother Country, United, The Diocese of York can be seen in the picture.

SUCCEEDS CHARLESWORTH

B. K. Sandwell, well known Canadian author and critic, who is reported to have been appointed Editor of Starsight to succeed Hector Charlesworth, who goes to Ottawa as head of the National Radio Broadcasting Commission.

No Comment From Soviets

Press Silent So Far On Annulment Of Trade Agreement

Moscow, Russia.—A despatch from London, England, reporting the annulment of the British trade agreement with Russia was published in Moscow newspaper without comment, apparently having been received too late for editorial expression.

During the Ottawa conference Soviet newspapers threatened reprisals if Great Britain sought to place restrictions on its purchases from Russia in accord with reported Canadian demands.

London, England.—There was a general recognition in the London press that the denouncement of the Anglo-Russian trade treaty was the logical sequence of the Imperial Conference at Ottawa.

Kingston Prison Riot

Claimed Convict Helped To Quell Disturbance

Ottawa, Ont.—The Ottawa Citizen carried the following despatch from Kingston following the penitentiary riot:

It is stated a threat was made to set a fire before "Red" Ryan, at one time a dangerous bandit, took action, and then he addressed an angry mob of convicts and appealed to them not to start the blaze or do any damage. "For God's sake, men, do not do this—it will not get you anywhere. I tried it one time and it didn't get me any place," he is reported as saying.

It is stated that "Red" Ryan's appeal helped to quiet down the convicts.

1,200 Men Given Work

Detroit.—David Widman, secretary and treasurer of the Murray Corporation of America, manufacturers of automobile bodies, announced that the company this week is rehiring 1,200 employees, mostly tool makers, and increasing its payroll about \$50,000 a week in preparation for the production of 1933 models by automobile factories.

Jobless Create Problem

Providing Government Officials With Plenty Of Worry

Calgary, Alberta.—Single jobless in western Canada are in a quandary and providing government officials with a knotty problem.

Efforts to have the Dominion government provide them with transportation back to their homes brought statements from Mayor Louis D. Taylor, of Vancouver, that he feared they would all say Vancouver for the coast city if such transportation were granted.

With 1,000 men in Edmonton without work and another 1,500 here, efforts were being made to find some means of aiding them during the winter months or paving the way for their return to their homes, which when the ban on rod-ridering went into effect at the end of September.

Civic officials here held no relief was being granted able-bodied single men. Whether any would be granted later was not ventured, pending an announcement of federal relief plans for the coming winter.

Criticizes British Attitude

De Valera Says Britain Playing Part Of Shylock

Dublin, Irish Free State.—Great Britain is "playing the part of Shylock" toward the Free State and at the same time petitioning the United States for relief from war debts "which no one denies are morally and legally due," President Eamon de Valera declared before the daily eireann today.

The president was making his report to the legislature on the failure of the negotiations in London which had been aimed at terminating the Anglo-Irish trade war. He said those negotiations had failed because Britain insisted members of a suggested arbitration committee should be limited to representatives of empire nations. This insistence, he added, ruled out any possibility of arbitration.

Mr. De Valera declared the Free State was neither legally nor morally obligated to pay land annuities to Britain.

Lumbermen Pleased

Abrogation Of Anglo-Soviet Commercial Treaty Good News To B.C. Lumber Interests

Victoria, B.C.—Abrogation of the Anglo-Soviet commercial treaty announced in London, England, is good news to the British Columbia lumber industry, which has been forced to compete with Russian dumped lumber in Great Britain.

"This is the most encouraging news that has been received for some time," said Hon. N. S. Loughheed, Minister of Lands, in commenting on the statement of Rt. Hon. J. H. Thomas that the Soviet trade agreement with Great Britain would be terminated.

OTTAWA PACT IS APPROVED BY BRITISH HOUSE

London, England.—A majority of 222 was secured by the government in the House of Commons on the first vote relative to the Ottawa agreements. The vote was not on the agreements themselves but on a resolution of procedure in connection with legislation implementing the agreements.

It was taken, nevertheless, as a good indication of how the House is divided on the trade agreement and the tariffs necessary to carry them out.

To implement the agreements it will be necessary to impose 22 new United Kingdom duties on foreign goods. The normal procedure would be to pass a separate resolution for each duty. The government motion before the House was to authorize the incorporation of the whole 22 duties into one resolution.

The government motion was carried 291 to 69, and the House reserved general debate on the main resolutions.

Major C. R. Atlee, former Labor Minister, announced the Labor party did not intend to be bound by the Ottawa agreement. He added that he understood his party's views were shared by Sir Herbert Samuel, Rt. Hon. W. L. Mackenzie King, Liberal leader of the Canadian House of Commons, and H. Scullin, leader of the opposition in the Australian government.

EVIDENCE IS SUBMITTED IN BRIGHT FAN CASE

Ottawa, Ont.—Conflicting evidence was adduced at the "Bright Fan" inquiry before Mr. Justice Humphrey Mellish of the Supreme Court of Nova Scotia. Captain R. E. Oliver, master of the British freighter which struck an iceberg and sank October 1 last, with 255,000 bushels of western grain loaded at Churchill, was the chief witness. Evidence was conflicting in regard to drinking among the officers and crew.

Captain Oliver, who was decorated for his war work in the patrol and transport services, passed through a long ordeal on the stand, weakening only when he begged to be excused from describing his war experiences.

Several witnesses stated there was no liquor on the ship and none in evidence at Churchill. Captain Oliver said he had done no drinking since leaving England.

Steward Gee said he had two cases of whiskey when he left England, also considerable port and brandy. When he left Churchill there was two bottles of brandy and two of port. When the ship went down there was one bottle of brandy and two of port.

Discontinue Dumping

Duty On Gasoline

Claim Duty Has Been Holding Up Price In Various Parts Of Canada

Ottawa, Ont.—An important step was taken by the government in ordering discontinuance of the dumping duty against gasoline imported from the United States. For some time complaints have been made that these dumping duties were holding up the price of gasoline in many parts of Canada. The regular duty of two and a half cents a gallon remains.

The dumping duty varied as the competitive prices of gasoline in the wholesale centres of the United States, but one estimate here was that it averaged about two cents a gallon.

Officials have declined to venture any forecast as to whether it would bring down the price of gasoline.

Attacks Trade Treaty

W. H. Moore Says Canada Is Forging Its Own Shackles

Ottawa, Ont.—Canada is forging its own shackles by accepting the United Kingdom trade treaty, parliament was advised by William H. Moore, Liberal, South Ontario, and former chairman of the tariff advisory board.

Canada's tariff, he said, would remain rigid for five years, irrespective of industrial, labor or economic conditions. The secret of a successful tariff was its flexibility to meet changes in trading, yet the Dominion was "tied both its hands blindly for five years," Mr. Moore held.

Age Of The Earth

Toronto Scientists Place Age At Three Thousand Million Years

Toronto, Ont.—Two Toronto scientists, by means of their experiments, claim to have confirmed the age of the earth at three thousand million years.

Professor E. F. Burton, chairman of the Physics department at the University of Toronto, and Professor J. C. McLennan claim that experiments with liquefied helium in glass vacuum bottles confirm deductions from analyses of radio-active rocks.

Compromise With Crime

Winnipeg, Man.—A far too tolerant attitude is being taken toward crime, and the present generation does not regard wrong-doing as a thing to be ashamed of, as did their fathers, Magistrate R. H. Graham remarked in police court here, when he reluctantly allowed three young men the freedom on suspended sentences of two years each.

Death Of Rhys Thomas

Winnipeg, Man.—Rhys Thomas, for a quarter of a century choirmaster and musical director in this city and well known throughout Canada as adjudicator at musical festivals, is dead in London, England, according to word reaching here.

Vancouver Cancels Winter Fair
Vancouver, B.C.—The annual winter fair here will not be held this year because of the expense involved, it was decided by the Vancouver Exhibition Association.

Glen Williams spent Sunday at the home of his parents at Bentley. Order your Christmas greeting cards at the Chronicle office.
Mrs. W. Major was a visitor in Calgary on Monday.

Boys and girls, be reasonable with your Hallowe'en pranks. Frank Trca was a business visitor in Calgary on Wednesday.

Walter MacAlay of Consort, is visiting his sister, Mrs. W. H. Miller.

Mrs. J. B. Thompson of Calgary is staying a few days at the home of Mrs. P. C. Griffiths.

Archie Baptie, special game guardian, was a visitor in town on Wednesday.

Mr. and Mrs. Gittel and children of Maple Creek, have taken up their residence in the Demers house.

A novelty gift sale and tea will be held in Halliday's store on Saturday, Oct. 29th by the Ladies Aid of the United Church.

Mr. and Mrs. J. R. Gilchrist and Daughters spent Sunday in Calgary, the guest of Mrs. Gilchrist's brother, W. Monkman.

Keep in mind the One Cent Sale at McClelland's Drug Store on Nov. 2, 3, 4 and 5.

The Floral U.F.W.A. will hold a chicken supper and dance in the East Community Hall on Friday, November 4th.

Thos. Tredaway who has been confined to his home with a severe cold for the past week, was able to be out and around again Tuesday.

Geo. Ainscough, J. P. Methers and W. Major were visitors in Calgary on Monday in connection with the manufacture of Major's automatic window stop.

Art Huiwood and Hans Olson are planning to leave on Saturday for their annual big game hunting trip.

Dances will be held in the Carstairs Hall every Saturday night from 9 until 12. Admission 30c each, tax included. Music by the BELLAMY Orchestra.

Walter A. Hurt has leased the blacksmith shop and equipment from Chris Asmussen. We understand Mr. Hurt will be open for business about the first of the month.

Mr. and Mrs. D. Bills and their grandchildren left on Wednesday for their home in Van Nuys, Cal. Mr. Bills makes his annual visit here in July, and general stays for three months, leaving just before snow flies for sunny California.

Mrs. Adderly with the help of many kind friends, has moved into the premises vacated by Lawyer Ure, Mr. and Mrs. W. Kurstner have vacated the Gilchrist house on Limit Avenue and moved into the house vacated by Mrs. Adderly on Hammond Street. Mr. and Mrs. R. D. Sutherland have rented the Gilchrist house and will take up residence here shortly.

Snow started to fall at eight o'clock today (Thursday) and it is still coming down at 5 p.m. There is considerable threatening to be done. With snow covering the ground to a depth of three inches and drifts in places two feet high, it looks as if winter had really set in.

WHEAT
Crossfield, Thursday, Oct. 27
No. 1 Northern.....29c.

System of Municipal Areas
The annual convention of the Municipal Districts will be held at Calgary on Nov. 16-18, and the main consideration, of course, will be the Government's proposal to reduce the number of 166 municipal districts, together with the 143 local improvement districts at present administered by the Department of Municipal Affairs at Edmonton, to forty rural areas.

U. F. A. Candidate Leads in Camrose

C. A. Ronning Expected to Win—Ahead on First Count

On the first count Tuesday night the Camrose election figures were:
Ronning, U.F.A. 2807
Westwick, Liberal, 1947
Layton, Conservative, 1114

As a clear majority is necessary to elect, Layton was eliminated and his second choices will be counted today to determine the winner. It is expected that the Layton second choices may favor Ronning, thereby increasing his majority.

Burglars Visit Beiseker

BEISEKER, Oct. 24.—Thieves who broke into the general store operated by Leon Gutman, here during the week-end, escaped with goods the value of about \$800. They made a getaway in Mr. Gutman's car, increasing the loss to about \$1,100.

Night Constable Needed

The appointment of a special constable for night duty, should be given careful consideration by the Council. Storekeepers in Crossfield, have lost several hundreds of dollars in merchandise in the past few years by burglars.

Crime of this nature is certainly on the increase, and steps should be taken to protect the merchants, who after all, are the heaviest taxpayers.

The expenditure of around \$50 a month for a special policeman, would be a severe blow to the Council, who in these times, are doing their best to cut expenditures to the limit, and are trying to reduce taxes. But on the other hand, some protection must be given the merchant.

Annual Bazaar November 26th.

The Womens Guild are holding their annual bazaar on November 26th in the U. F. A. Hall. Will also serve tea and sell home cooking. They have some very nice fancy work and it would be worth your while to have a few Xmas gifts ready, so come along and see what they have at reasonable prices.
